4WD ROOF RACKS
& ACCESSORIES

 **Tracklander**

“

*The perfectly engineered
balance of form and function,
no matter the journey.*

NO MATTER

DRIVEN BY DESIRE

Tracklander began in October 1975 from a modest steel fabrication business in Perth, WA. Back then, roof racks were mainly of the homemade variety and not designed for serious off-road travel. Not surprisingly, a great deal of racks (and often their loads) were left abandoned by the rugged dirt tracks leading to Australia's top end.

This challenge drove our desire to design a scientifically proven, durable roof rack range, designed from the ground to deliver the ultimate in performance and dependability for the serious four-wheel drive enthusiasts.

A rack purpose built to handle the extreme conditions with ease, whilst complementing the integrity of the vehicle. Minimising wind noise while protecting vehicles from damage, ensuring travellers arrive at their off-road destinations in safety and comfort.

Today this dedication continues, with every product in the Tracklander range, delivering the perfectly engineered balance of form and function, no matter the journey.

THE JOURNEY

FOR ENTHUSIASTS. BY ENTHUSIASTS.

WHY YOU DON'T WANT ANYTHING ELSE WHEN YOU'RE OFF-ROAD

TRACKLANDER RACKS

AS TOUGH AS THEY COME...

Built to endure Northern Australia's harshest conditions and tested in some of the roughest terrain imaginable the sturdy Tracklander Roof Rack is designed specifically for extreme off-road use.

Our UniFrame construction guarantees tough durability, whilst the fully welded, all-aluminium frame and mesh base provide a super lightweight roof rack, with maximum off-road capabilities and strength. Featured on the mesh base are multiple tie-down points for optimal security and the large range of innovative Tracklander accessories makes carrying loads simple and convenient. Most importantly, the impact-resistant acrylic wind deflector and sleek leading-edge design means quieter travel is assured every time.

✓ **FLEXES WITH YOUR VEHICLE,
PROTECTING IT FROM DAMAGE**
Tracklander incorporates our unique Flex-Tech engineering, protecting your 4X4 vehicle in off-road situations. Gutter-mounted roof racks are provided with a unique gutter support system to reinforce and protect the gutters.

✓ **UNLIMITED TIE DOWN POINTS**
The Tracklander mesh base is welded at every contact point along the base of the rack. This provides unlimited strong tie-down points and increased strength for your roof rack.

✓ **DEPENDABLE POWDERCOATING**
Tracklander roof racks are finished in UV stabilised Ripple Black powdercoat 2.5 times the thickness of standard powdercoating finishes. The racks are acid dipped for optimum adhesion, protecting from fade and wear, keeping your Tracklander rack looking great for years to come.

✓ **QUIET, SMOOTH TRAVEL**
Tracklander roof racks have been wind tunnel tested and utilise our wind deflection technology to provide quiet travel and minimal fuel consumption.

✓ **RACKS ARE NOW EASY TO FIT AND REMOVE**
Tracklander Tough bar mounting systems provide better securing, robust strength and better access to the roof for cleaning. Aluminium or galvanised and powder coated with the classy Tracklander finish.

✓ **ACCESSORIES FOR EVERY APPLICATION**
Tracklander accessories allow you to customise your rack to suit your exact requirements. They also provide perfect securing ability and quick and easy access. From side fixed or removable ladders, solar panel mounts, jerry can holders, recovery track holders and many more.

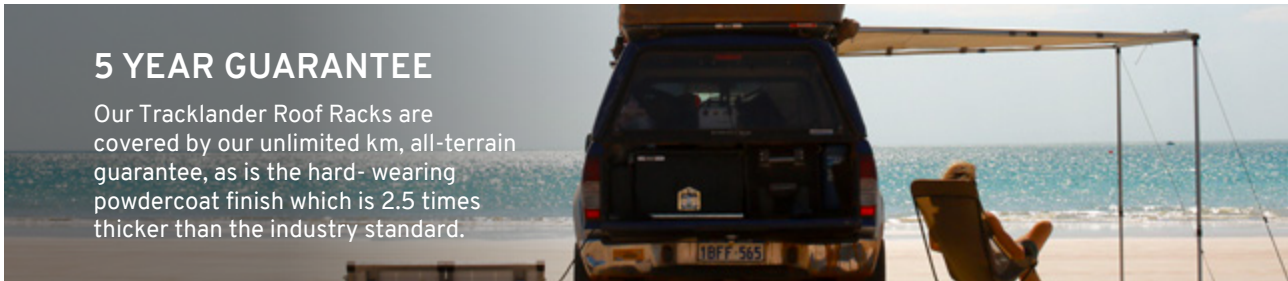

SUPER LIGHTWEIGHT AND STRONG

Our Uni-Frame systems allow us to keep the weight down while giving you unparalleled strength.

OFF ROAD LOAD RATING

All Tracklander Roof Racks are OFF ROAD load rated! With up to 200kg load rating, Tracklander has you covered.

5 YEAR GUARANTEE

Our Tracklander Roof Racks are covered by our unlimited km, all-terrain guarantee, as is the hard-wearing powdercoat finish which is 2.5 times thicker than the industry standard.

WIND TUNNEL TESTED

Tracklander's wind tunnel testing, with our impactresistant acrylic wind deflectors or aluminium lower wind deflectors, means a quiet ride for you and your family.

INNOVATIVE ACCESSORY RANGE

Tracklander's huge range of innovative accessories, including our large range of side-fixed ladders, keep your load safe and secure.

GUARANTEED RELIABILITY THE RACK THAT HAS YOUR BACK

Every Tracklander roof rack and accessory is 100% backed with backed with rock solid 5 year unlimited km guarantee. If you intend on adventuring through the real Australian outback, you can't afford to take any chances. Your Tracklander roof rack will support you with everything you need.

UNPARALLELED STRENGTH

Fully welded, tested and proven over many years on the toughest road environments and off-road terrains, Tracklander Roof Racks are built to last. Tracklander's Tough Bar mounting system has been designed to the same exacting standards, providing unlimited strength in addition to maintaining a low profile and smart looks. And the same principles are applied to our gutter mounted legs which have been tested to the international roof rack standard *ISO PAS 11154:2006.

VEHICLE PROTECTION LIKE NEVER BEFORE!

The innovative Flex-Tech system enables the rack to move with your vehicle, protecting it from potential internal and external damage, including cracking. Our brackets are built to match the shape of the roof line exactly, thereby preventing any unwanted pressure. Corners and edges incorporate curves to allow stress to move through the joints freely, and foam or specially shaped PVC protection is used on all contact points to prevent metal-on-metal exposure.

PEACE OF MIND AND SECURITY

The large range of useful Tracklander accessories hold your load secure and firm which further protects from damage.

RACKS FOR TRACKS

HOW TO CHOOSE THE RIGHT OFF-ROAD RACK

The Tough Tracklander Roof Rack is the result of nearly 50 Years of experience in 4WD roof rack manufacture and design. But how did Tracklander's designers find the secret to mastering some of the roughest terrain on the planet? Here's some handy tips to help you choose.

HOW TO BEAT VIBRATION

If you're touring in a 4x4 you're going to come across corrugations and wash-aways. The resultant hammering vibration is what causes many racks to end up on the side of the road. You can't afford this when you're hundreds of kilometres from help, let alone the repair bill from the damaged caused by the failure.

KEY POINTS TO LOOK OUT FOR:

- ① Strength in the rack design- look for 100% load rating.
- ① The heavier the rack the less you can carry.
- ① Multiple tie down points-good securing points vital- for rough roads.
- ① Good range of strong and reliable accessories to secure the load properly.
- ① Proof from experience and a guarantee to match.
- ① Vehicle protection.

HOW TRACKLANDER DELIVERS

Unparalleled strength

- ✓ Fully welded, tested and proven design.
- ✓ Cambered cross bars take the stress
- ✓ Heavy duty mesh gives multiple securing points and perfect loading platform.
- ✓ Lightweight but strong- provides full 100% load rating
- ✓ All clamp designs tested to international roof rack standard * ISO/PAS 11154:2006 Road vehicles - Roof load Carriers and all versions are engineer certified.

Protection of your vehicle

- ✓ The Flex-Tech technology flexes with the vehicle and protects its structure from cracking and damage.
- ✓ The brackets are built to exactly match the shape of the roofline to reduce pressure.
- ✓ Corners and edges are curved to allow stress to move through the joints.
- ✓ Foam or PVC protection is used on all contact points to prevent metal to metal contact.

Security

- ✓ The large range of useful Tracklander accessories hold your load secure and firm which further protects from damage.

THE SMART CHOICE

TRANSFERABLE TO YOUR NEXT VEHICLE

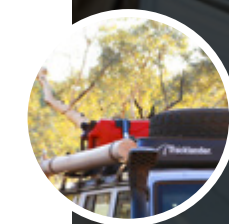

Tracklander roof racks can be transferred to other vehicles by simply changing the leg mounts.

LIGHTWEIGHT, YET STRONG AND DURABLE

Tracklander engineers have found the perfect balance between strength and weight. Utilising thick wall aluminium extrusion and unique bracing technology, Tracklander provides unrivalled strength and load-carrying capacity, meaning Tracklander will usually outlast your vehicle.

AN ATTRACTIVE ADDITION TO YOUR VEHICLE

The low profile aerodynamic and ergonomic styling provides a rugged roof rack that complements any vehicle.

A PERFECT FIT FOR ANY LIFESTYLE

FULLY ENCLOSED

The most popular model. A reliable tourer that every 4WDriver enjoys. Secure anything to the tough mesh base and experience the large range of bolt-on accessories.

FLAT TOP

The lowest profile 4WD roof rack is the Carry-all flat top TrackLander. Experience the same load security and still access low-profile garages. Includes a built-in front wind deflector. Add-on any of our large range of bolt-on accessories.

TRADIE / OPEN ENDER

With a large internal width of 1.23m, this is perfect for the tradie during the week and recreation for the weekend. Ideal for carrying longer items, the fully welded mesh base makes it easier to load and secure all items. Fitted with a front wind deflector tailored to suit your vehicle.

STEER CLEAR

Eliminate the wind noise and drag. All tracklander roof racks include a vehicle-specific wind deflector *at no extra cost.*

Tracklander 2.2m flat top on new **TOYOTA LC300 Series.**

INDUSTRY LEADING ULTRALIGHT MODERN DESIGN

Every Tracklander rack is the result of dedicated effort to ensure maximum weight reduction, optimal load balance and a minimised impact on driving performance.

Our racks are thoroughly wind tested and designed using the latest lightweight aluminium materials, with attention to minimising material weight while maximising strength integrity.

Offering a smoother, quieter and more efficient ride for you and your family.

This means better steering performance, reduced noise and drag as well as improved fuel economy.

Tracklander is always ready when you need it, and never in the way when you don't.

RECOVERY TRACKS HOLDER

Holds 2 sets (pair) of Maxtrax Branded recovery tracks or 1 set (pair) of any other recovery track.

TILTING SOLAR PANEL FRAME

An easy fix accessory which allows you to adjust the frame to follow the sun. Gas strut operated with side clips. Heavy duty and can be left in position when mobile.

SPARE WHEEL HOLDER

Designed for maximum security over long distance trips. Be 100% sure your wheel is secure with this simple and effective accessory. A Padlock can be added for additional security.*

ON THE RIGHT TRACK

Could not source a rack in SA after trying a few dealers so called Jaram. Placed order over the phone on Friday morning, rack turned up following Monday, amazing!

Quality of materials is fantastic, 316 stainless steel bolts, design and build the best I've seen. I purchased the flat rack for Prado 150, great low profile and solid is an understatement.

Hardly known product here, must be a best kept secret in WA! Thanks Jaram I'm proud to drive around with this on my roof and look forward to many years of service.

-C Balogi

Honestly if you're looking for a strong reliable roof rack go see these guys they are a dream to deal with.

Had our rack about a year now and about 5 months with the correct deflector thanks to Greg and we love it so much so we're ditching our other branded flat rack (came with our second 4wd) to get another tracklander system.

-Blair Signorotto

I ordered a tracklander full length flat top rack for the Prado through Jaram and couldn't be happier. The service from start to finish was great, thanks to Greg and Wendy, plus the rack arrived just 2 days after payment (Perth to Karratha!). Much appreciated guys and will recommend Jaram every time.

-Taryn Milroy

I bought a Tracklander flat top low-profile rack for my Toyota Prado 150 and I couldn't be more impressed with the level of service and build quality. I had a few questions initially and Tracklander were super supportive pre and post purchase and I can highly recommend their products and company. Thanks again guys.

-Ross Hellings

Tracklander is a fantastic roof rack. I have now had 2 of these and swear by them.

I do a lot of off-road and I have seen other racks have many issues (even big brand name ones) but my Tracklander never misses a beat.

The mesh makes it very easy to load and secure. Nice and quiet on road. Australian company. Australian design for Australian conditions! Don't risk it - If you are travelling off road consider Tracklander and you won't be disappointed.

-Silvia Ju

We are in the business of fitting out dedicated overland vehicles, some of which are strewn about the world. When fitting these vehicles with accessories, you want a product that is the best in its class and will last the life of the vehicle. When planning vehicle (and more specific roof) storage, Tracklander Roof Racks are the only option we will supply for this application without a shadow of a doubt. Great product, great service and a local manufacturer. That ticks all the boxes for us.

When it comes to reducing the weight carried on top of a 4WD, aluminium is the way to go and when it comes to roof racks, Tracklander is the best option. I replaced the heavy steel roof rack attached to my Prado with a flat top low profile rack with the full-length tough bar mounting kit. This backbone ensures the weight of the rack is evenly distributed across the length of the Prado rails. I also installed the Tracklander Front Mount Spotlight Brackets for the four Lightforce Strikers on the front of the rack and used Tracklander mounts for my Quick Pitch ensuite tent. A Tracklander Double Jerry Can Holder took care of the extra fuel needed on my remote adventures and the Tracklander Recovery Tracks holder kept the four Treds in place while providing easy access to them at the same time. The benefits of using Tracklander mounting solutions meant that they were easy to install and suited the roof rack at the same time. As a travel writer who loves to tackle the most remote tracks in Australia, Tracklander has been a great choice and has never let me down.
